

Electronic Nicotine Delivery Systems (ENDS)

and the Smokefree 2025 goal

Are you wondering how electronic nicotine delivery systems (ENDS) such as e-cigarettes might contribute to New Zealand's smokefree goal and reduce disparities in smoking among Māori and Pacific peoples?

Register now for this 1-day Public Health Summer School course, to hear the latest evidence

ENDS is a hot topic in tobacco control. Hear a variety of perspectives as we:

- Explore uptake among NZ smokers
- Probe whether and how movement from smoking to vaping occurs
- Explore the motivations, experiences and intentions of different ENDS user groups
- Consider community workers' experiences of ENDS as a cessation tool
- Review how policies could protect vulnerable groups while supporting smokers to transition to ENDS

PRESENTERS

The day will be led by smokefree researchers from ASPIRE2025 and will include a panel discussion featuring cessation practitioners, representatives from the vaping sector, and researchers.

ASPIRE2025

Monday 12 February 2018

University of Otago, Wellington | Mein Street | Newtown | Wellington

Early bird registration closes 20 December 2017
